

Top Card Instructions

A game for 2 or more players

1. Shuffle all the cards face down.
2. Share the cards equally between the players and keep them face down in a pile.
3. The starting player selects the topmost card from their pile and chooses a category from that card (population, height or length, weight or life expectancy) that they think will have a higher value than their opponents.
4. The opponents reveal their topmost card from their pile and the players compare the same category.
5. The winner (the largest value), takes all the cards from that round and places them at the bottom of their pile.
6. The winner selects the next topmost card and chooses the category for the next round.

The winner is the player who has all the cards.

Amur Leopard

Population:	60
Height or Length:	70cm
Weight:	45kg
Life Expectancy:	18 years
