Online safety for primary school children

As your child gets older, and technology changes, make sure you continue talking about what they are doing online and how to stay safe.

Talk about what they do online, what sites they visit and their favourite websites.

Discuss safety rules and how much personal information they should share online.

Make sure your child knows what to do if anything upsets them online and reassure them that they can come to you.

• Check who your child is playing online games with and that your child knows what information they can share with others.

Use parental controls across all of the devices that your children have access to.

Set 'Safety Mode' up on YouTube to help filter out explicit content.

If you use Google, turn on Google '<u>Safe Search</u>' to filter sexually explicit content from your search results.
